

## Grid Repair

Includes Test Lamp

Repair scratched or broken defroster lines. The damaged grid area is masked off and repaired by painting the conductor over the damaged area. The conductor bonds aggressively, dries quickly and is color matched for invisible repairs. Repair on glass antennas as well.

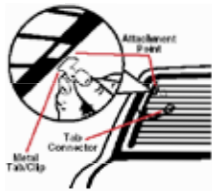

90° Tab Connector

Part No. 2720-5B

Part No. 2100

## Adhesive Tab Repair

Reattach the main power tabs to automotive rear window defrosters with two part silver adhesive. This highly conductive adhesive bonds aggressively, forming the electrical and structural connection in one simple operation.

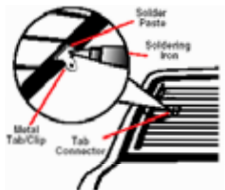

Part No. 2000

Straight Tab Connector

Part No. 2720-5S

## Solder Tab Repair

Some defrosters have a metal solder pad and it may be preferable to re-solder the main power tabs. This sticky solder paste is a water soluble formula that solders the separated defroster tab back in place. Part No. 2010

Replacement Power Tabs

Part No. 2710-5S

Replacement Power Tabs

Part No. 2710-5B

Frost Fighter®
